EDUCATION

University of Utah

January 2026 – Present

BS in Computer Science, Minor in Mathematics

GPA: 4.00/4.00

- **Relevant Coursework:** Data Structures and Algorithms, Software Engineering I, Calculus II, Abstract Linear Algebra, Discrete Mathematics, Engineering Probability and Statistics
- **Honors:** Honors College, Price College of Engineering Scholarship, Dean's List
- **Expected Graduation:** Fall 2028

Southern Utah University

January 2025 – December 2025

Undergraduate Studies in Computer Science

GPA: 4.00/4.00

- **Relevant Coursework:** Object-Oriented Programming, Calculus I, Technology and Ethics

WORK EXPERIENCE

University of Utah

August 2026 - Present

Computer Science Teaching Assistant

- Led weekly lab sessions and office hours for 150+ computer science students, teaching core software engineering concepts and tools, including **PyCharm** and **Linux**.
- Graded weekly programming assignments and exams in **Python**, delivering constructive feedback to improve code quality.
- Leveraged **Codex** to improve grading pipeline efficiency and debugging.

Brian Head Resort

October 2024 - March 2025

Ski Lift Operator

- Worked collaboratively in a fast-paced environment, developing communication and problem-solving skills under pressure. Ensured the safety of 2,000+ guests daily.

PROJECTS

Math Concept Graph | React, D3, LaTeX, Vite, Git

April 2026

- Built a responsive interactive dependency graph of 300+ mathematical concepts using **React**, **D3**, **Vite**, and **Git**, with force-directed layouts, zoom/pan, draggable nodes, and dependency-aware highlighting.
- Engineered a maintainable and extensible concept architecture with automatically computed dependency tiers, live search, **LaTeX** rendering, and lazy-loaded rich content modules.

Minimax Tic-Tac-Toe Program | Java, JUnit

February 2026

- Unbeatable closed search algorithm for a zero-sum game, implemented using clean and modular OOP software architecture with sophisticated documentation in modern **Java**.

Secure Password Generator | Python, Tkinter

April 2025

- Designed and built a GUI-based **Python** desktop application using **Tkinter** to generate and export custom, secure passwords based on user-selected criteria.

TECHNICAL SKILLS

Languages:

Python, Java, C#, Bash, HTML/CSS

Tools & Libraries:

Git, Linux, Vite, JUnit, React, Codex
